

## **Mahr Metering Systems acquires Unipre**

**With the acquisition of Unipre GmbH, Mahr Metering Systems GmbH is expanding its activities in the market of mixing and dispensing machines.**

Mahr Metering Systems GmbH, an international company whose portfolio includes gear pumps and mixing and dispensing machines, has acquired Unipre GmbH, based in Werl (North Rhine-Westphalia/Germany).

Since 1974, Unipre has been established on the market as an innovative quality supplier of dispensing and mixing systems for processing liquid plastics, specialized in the construction of tailor-made machines and systems. "The sales intentions of Theo Hunold, the Managing Partner of Unipre GmbH, offered us the ideal opportunity to put the business unit of dispensing and mixing technology on a broader basis and to strengthen it", says the managing director of Mahr Metering Systems, Dr. Reiner Karl, explaining the investment. He also emphasizes: "The product range of both companies complement each other perfectly."

The company in Werl will be managed under the name Mahr Unipre GmbH. "With Mahr, we have found an investor who will continue Unipre's many years of expertise in the field of mixing technology and continue to drive technology development", says Hunold. The location in Werl is thus preserved and the merger creates new jobs.

In the future, Mahr Metering Systems in Göttingen will concentrate on the growing business with gear metering pumps. At the new location in Werl, the machine business of Mahr Metering Systems and Unipre will be merged and expanded.
